**Safety information**

The following sections describe the safety guidelines for this product.

**AC adapter**

This product is intended to be supplied with a listed ARRIS desktop AC adapter marked Class 2 or I/O and rated 100 – 120V, 50/60Hz 1A, Output 12V, 3.75A for all NVG558 series gateway models.

The AC power adapter supplied with this product is designed to ensure your personal safety and to be compatible with this equipment. Use only the power adapter that was provided with the gateway.

Please follow these guidelines:

- Do not use the adapter in a high moisture environment. Never touch the adapter when your hands or feet are wet.
- Allow adequate ventilation around the adapter. Avoid locations with restricted airflow.
- Connect the adapter to a proper power source. The voltage and grounding requirements are found on the product case and/or packaging.

**Repairs**

Do not, under any circumstances, attempt any service, adjustments, or repairs on this equipment. Instead, contact Verizon for assistance. Failure to comply may void the product warranty.

**Location - electrical considerations**

**CAUTION:** Due to risk of electrical shock or damage, do not use this product near water, including a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool. Also, avoid using this product during electrical storms. Avoid locations near electrical appliances or other devices that cause excessive voltage fluctuations or emit electrical noise (for example, air conditioners, neon signs, and large lights or bells).

**Location - environmental considerations**

Do not plug the power adapter into an outdoor outlet or operate the residential gateway outdoors. It is not waterproof or dustproof, and is for indoor use only. Any damage to the unit from exposure to rain or dust may void your warranty.

Do not use the residential gateway where there is high heat, dust, humidity, moisture, or caustic chemicals or oils. Keep the gateway away from direct sunlight and anything that radiates heat, such as a stove or a motor.

Do not use the adapter if the cord becomes damaged.

**Replace the unit if it is damaged or exposed to excess moisture.**

**MPE/SAR/RF exposure information**

This device was verified for RF exposure and found to comply with FCC OET bulletin 65 RF exposure requirements. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

**WARNING:** With this device in operation, a separation distance of at least 30 cm (12 inches) must be maintained between the radiating antennas and the bodies of all persons. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Making changes to the antenna or the device is not permitted. Doing so may result in the installation operator losing RF exposure requirements. This device must not be co-located or operated in conjunction with any other antenna or radio transmitter.

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure is required to be in the operating and maintenance instructions.

**LED descriptions**

**LED**

- **Power**
  - Solid Green: The device is powered on.
  - Flashing Green: The device is starting.
  - Flashing Red: Detecting factory reset (press and hold the recessed Reset button for 10 or more seconds to trigger the factory reset).
- **Broadband**
  - Solid Yellow: Cellular WAN connection is fair.
  - Solid Green: Cellular WAN connection is good.
  - Flashing Green: Trying to connect to the available network.
  - Solid Red: No Ethernet WAN connection on the line.
- **LAN/WAN Ethernet LEDS on rear panel RJ-45 ports**
  - Solid Green: Port is active.
  - Solid Red: Port is not active.
  - Flashing Green: Traffic is passing on the line.

**ARRIS NVG558 Gateway Quick Start Guide**

**Introduction**

Use this Quick Start Guide to install, configure, and perform basic troubleshooting for the ARRIS NVG558 gateway.

**Power supply installation**

Connect the power supply cord to the Power In connector on the gateway and the other end into an appropriate electrical outlet.

**Product ventilation**

The gateway is intended for residential use. Position the gateway in a vertical position and where temperature remains within a range of 32° – 104°F (0° – 40°C) and heat from the unit itself is not trapped. There must be at least two inches (2”) of clearance on all sides except the bottom.

**Gateway positioning**

Position the gateway in a vertical position. Proper positioning of the gateway is essential for proper cooling.

**Status indicator lights and port configuration**

Colored LEDs on the gateway indicate the status of various port activity.
2. Select

1. Provide the Access Code - this is a unique code printed on the label on the base of the gateway.

If, while connected to the NVG558 web management interface, you are attempting to look at NVG558 web pages that can change the configuration of the gateway, you will be asked for the Access Code to proceed.

To make changes to the default Wi-Fi name/password:

• To add a wireless device to the gateway, use your phone or tablet to scan the QR code on the side of the gateway.

To connect a computer to the gateway via Wi-Fi:

1. Look for the Wi-Fi network with a name starting with “Verizon-XXXX” in your computer’s Wi-Fi settings, where “XXXX” will match the network name printed on the label on the side and bottom of the NVG558.

2. Open a web browser on your computer (such as Firefox, Chrome, or Microsoft Edge) and type the following address in the address bar to open the Access Code Required Screen: http://myrouter

Access the Web Management Interface

To connect a computer to the gateway via Wi-Fi:

1. Use the phone or tablet you connected to the NVG558 Wi-Fi by scanning the QR Code, or connect a laptop to the NVG558 via Ethernet LAN port.

2. Enter the address http://myrouter into your web browser to open the Web Management configuration pages.

3. Navigate to the Wi-Fi section to make changes to the settings.

4. When prompted for the Device Access Code, that can be found on the product label on the base of the gateway.

Select Continue.

Access the Web Management configuration pages

If, while connected to the NVG558 web management interface, you are attempting to look at NVG558 web pages that can change the configuration of the NVG558 you will be asked for the Access Code to proceed.

1. Provide the Access Code - this is a unique code printed on the label on the base of the gateway.

2. Select Continue.

Add a wireless device to the gateway

• To add a wireless device to the gateway, use your phone or tablet to scan the QR code on the side of the gateway.

• To make changes to the default Wi-Fi name/password:

1. Use the phone or tablet you connected to the NVG558 Wi-Fi by scanning the QR Code, or connect a laptop to the NVG558 via Ethernet LAN port.

2. Enter the address http://myrouter into your web browser to open the Web Management configuration pages.

3. Navigate to the Wi-Fi section to make changes to the settings.

4. When prompted for the Device Access Code, that can be found on the product label on the base of the NVG558.

NOTE: The main page provides an overview about the connection and network status. You can also access information for the following:

- Home: Network Status/Configuration
- System: System status, restart and factory reset options
- Broadband: WAN Ethernet, and Wi-Fi indicators will be off.
- Wi-Fi: Wi-Fi status and configuration
- Network: LAN status and configuration
- Firewall: Firewall status/configuration
- Diagnostics: Gateway connection and application diagnostics
- Cellular: Cellular statistics, settings, and APN management.

Declaration of conformity

The following sections describe regulatory compliance by region.

FCC compliance

This device has been tested and certified as compliant with the regulations and guidelines set forth in the Federal Communication Commission - FCC Title 47 Part 15 regulatory requirements.

Manufacturer: ARRIS
Model: NVG558
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1) This device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation of the device.

The device could automatically discontinue transmission in case of absence of information to transmit, or operational failure. Note that this is not intended to prohibit transmission of control or signaling information or the use of repetitive codes where required by the technology.

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate this equipment.
